

Access Controller Dynamic QR Code Reader With Wiegand Output

QR-86D

Functions and features

1. Wiegand signal QR code, simple wiring and long distance (up to 100 meters);
2. The mobile phone number is used as the card number, which is more convenient to set;
3. The WeChat applet generates a new dynamic QR code every 1 minute;
4. A screenshot of the QR code can be shared with visitors via WeChat and QQ with one click;
5. The shared QR code is valid for a short time;
6. The two-dimensional code opening permission can be flexibly set through the access control software: which phones can be opened and which doors can be opened during which time periods;
7. There will be records and inquiries when opening the door with the QR code!

Specifications

Volume	86*86*42mm	Reading distance	0-20CM
Material	PC material	Scan code features	automatic induction, buzzer prompt
Reading window	tempered glass	Light source	Built-in LED light source, anti-glare interference
System interface	Wiegand, RS485, RS232	Card reading distance	3-6CM
Decoding support	QR, one-dimensional code	Operating system	Windows (xp 7810), Linux
Working voltage	Support 4-15V wide voltage input	Indicating status light	red work light, green feedback light,
Working current	800mA		emerald green network light
Reading speed	<200ms	Card reader type	non-contact IC card, ID card
