## WHAT IS GPS / ELECTRONIC GUARD TRACKING SYSTEM

GPS guard tour tracking software and electronic guard patrol tracking apps are two names for the same thing: Real-time situational awareness of your security officer's latest position and activities.
support special function of historical track playback of GPS, can send data by WIFI. It's easy to track patrol route and check time.

What is a guard monitor?

When a guard visits a checkpoint the information is available in real time, online for the monitoring center.
Management and even end users are able to see online, in real time how the rounds are progressing.

Specifications

S4A Model	GTP-6900
Product Name	GPS Guard Tour Probe Systems
Specifications	
Reading Method	Auto-induction, free from pressing any button
Display	TFT 1.8 ' High-definition color display
Sensor Frequency	125kHz EM ID Card
Direction	LED+Vibration+LCD
Storage capacity	80,000pcs
Impact record capacity	32,000pcs
Event	500pcs
Battery	3,000 built-in lithium battery
Working consumption	60 to 80mA
Lighting	5 modes lighting as a torch at night
Working temperature	40℃ to 70℃
Working humidity	0 to 95%
IP rating	IP 65
USB	Magnet Pogo Pin USB port
Product Parameter	
Dimensions (L*W*H)	117mm x 70mm x 30mm
Net weight	150g
